

Campus B

[Positive Impact Internship 2022](#)

Students will work with organizations working to make a difference in the world, while serving as an opportunity to have a positive impact by increasing student accessibility to global experiences. The program is open to all students; however, this program offers scholarships to underrepresented students in order to ensure more voices and perspectives are heard in solutions that will help move the world forward.

Students are divided into small groups and paired with Brazilian organizations or companies to work on a project. Each team is composed of 5-7 students, with some Brazilian students on each team. This not only challenges students to improve their intercultural communication skills, but also helps participants better understand the local contexts. In addition, the teams will be composed of students from a variety of different majors. Having a broad range of disciplines represented in this program contributes to the richness of solutions that students are able to develop.
